FULL STACK DEVELOPER | MERN STACK DEVELOPER

Full stack developer skilled in React, Redux, UI libraries, Node.js, Express.js, MongoDB, SQL and Next.js with experience in building responsive and interactive web apps. Currently interning at SecWebXperts, focusing on web development and UI/UX improvements. Passionate about learning new technologies and creating seamless user experiences.

TECHNICAL SKILLS

React	Express.js	Node.js
Redux	Node.js	SQL
Next.js	MongoDB	Git, Github
vps hosting & management	SSL certificate (Let's encrypt)	Domain & DNS Configuration
		Self-hosted deployments (jitsi)

PROFESSIONAL EXPERIENCE

Secwebxperts privet limited

Sep 2024 - Mar 2025

Web Developer Intern

As a Web Developer Intern at SecWebXperts, I focused on building and enhancing responsive web applications using React and various UI libraries. I collaborated with the team to develop intuitive user interfaces, optimize performance, and ensure seamless user experiences. My role involved implementing interactive components, integrating APIs, and refining UI/UX designs to improve application functionality and aesthetics. Through this experience, I gained hands-on expertise in web development, best coding practices, and teamwork in a professional setting.

PROJECTS:

Real-Time Chat Application(<https://chattu-mern.vercel.app/>)

- Developed a real-time chat application using the MERN stack (MongoDB, Express.js, React, Node.js) and Socket.io instant messaging.
- Implemented user authentication and authorization with JWT to ensure secure access.
- Integrated Cloudinary for image uploads, allowing users to share media in chats.
- Designed a responsive UI using Material-UI, ensuring compatibility across devices.
- Utilized Redux Toolkit for efficient state management of user sessions and chat messages.

Ride Booking Application (Not hosted)

- Developed a ride-booking app inspired by Uber using the MERN stack and React Native for a seamless user experience.
- Integrated Various Maps API for real-time location tracking and route suggestions.
- Implemented JWT-based authentication and role-based access control for secure user and driver interactions.
- Enabled real-time ride status updates using WebSockets for smooth communication between users and drivers.

Travel Booking Platform (Not Hosted)

- Developed a hotel and tour booking platform using the MERN stack with secure user authentication.
- Implemented hotel search, room booking, saved hotels, and payment processing with Razorpay.
- Integrated JWT authentication for secure user management.
- Designed a RESTful API with Express.js, handling hotel, tour, and user-related operations efficiently.

EdTech Platform (On-going)

- Integrated JWT-based authentication and role-based access for students and admins.
 - Live Classes: Integrated self-hosted Jitsi Meet for real-time virtual classrooms with student presence tracking.
 - Recorded Video Streaming: Added secure video upload and playback using BunnyStream integration.
 - Core Features: Student registration, course management, class notes in PDF, admin dashboard, and dynamic receipt PDF generation.
 - VPS Deployment: Configured and deployed the app on a Linux-based VPS using NGINX, PM2, and HTTPS with domain setup.
-
