OBJECTIVE

Enthusiastic and skilled high school student proficient in the MERN stack, PostgreSQL, Git, GitHub, and various UI libraries. Seeking an opportunity for a web developer job or internship to apply my technical skills and grow in a professional environment.

SKILLS

- Web Development: MERN Stack (MongoDB, Express.js, React, Redux, Node.js) ☐
- App Development: React Native ☐
- Database Management: SQL, MongoDB ☐
- Version Control: Git, GitHub ☐
- UI Libraries: Proficient with various UI libraries ☐
- Other: Web and tech-savvy, quick learner ☐

EXPERIENCE

Software Developer Intern

Remote (3-month internship, ongoing)

- Collaborating with a team to develop and maintain scalable web applications and also android application.
- Working on the full-stack development of an internal project using the MERN stack.
- Designing RESTful APIs and integrating front-end interfaces with back-end functionality.
- Implementing features like authentication, user roles, and dashboard analytics using JWT and Redux Toolkit.
- Actively participating in code reviews, team meetings, and brainstorming sessions to improve code quality.

PROJECTS:

Personal Portfolio Website(<https://new-portfolios.vercel.app/>)

- Developed a personal portfolio website using React to showcase projects and skills. □
- Implemented responsive design to ensure compatibility with various devices. □ Integrated with GitHub to display the latest projects and contributions. □

E-commerce Application(Not hosted)

- Built a full-stack e-commerce application using the MERN stack. □
- Designed RESTful APIs for managing products, users, and orders. □ Implemented user authentication and authorization using JWT. □

Real-Time Chat Application(<https://chattu-mern.vercel.app/>)

- Developed a real-time chat application using the MERN stack and Socket.io for instant communication between users.
- Implemented user authentication and authorization using JWT for secure access to chat rooms.
- Integrated Cloudinary for image uploads, allowing users to share images in chat.
- Designed a responsive UI using Material-UI to ensure compatibility with various devices.
- Used Redux Toolkit for state management to handle user sessions and chat messages efficiently.
- Integrated notification features to alert users of new messages in real-time.

Ride Booking Application (*Not hosted*)

- Built a ride-booking app inspired by Uber using the MERN stack and React Native.
- Designed RESTful APIs for user registration, driver management, and ride booking.
- Integrated Google Maps API for real-time location tracking and route suggestions.
- Implemented secure user authentication using JWT and role-based access control.
- Developed a responsive user interface for seamless booking and trip management.
- Integrated payment gateway for ride payments.
- Used WebSockets to enable real-time status updates for rides.
